

All-in-one Touchscreen Barebone PC

The Shuttle X50 Barebone White is an all-in-one PC boasting a 39.6cm (15.6-inch) touchscreen LCD powered by Intel's Atom 330 dual-core processor. Intended for use in the home environment, the Shuttle X50 Barebone is targeted at hardware experts seeking to build a complete system according to their individual requirements. The bulk of components is yet built in, just three components need to be installed: memory, hard disk and operating system. Equipped with Intel's GMA950 onboard graphics, it provides generous performance for daily computing with internet and office applications. A webcam, built-in speakers, card reader, WLAN and other features leave nothing you could ask for. Have any applications start up quickly by just touching the screen for working most swiftly and conveniently.

Shuttle All-in-One PC **X50 Barebone White**

Shuttle X50 Barebone White - Special Product Features

All applications at your fingertips

The innovative touchscreen technology delivers the simplest operation possible and makes the screen the centre of action. Its high-quality design lets you control the whole range of multimedia - music, movies, video playback and web browsers start by just touching the screen.

Dual Core. Do more.

The vast majority of the existing netbooks and all-in-one PCs with an Intel Atom CPU use the original Single Core version. In contrast to this, Shuttle's all-in-one PC stands out from the crowd with its embedded Intel Atom 330 Dual Core processor, which is boosting the productivity of the PC system, particularly with regards to multithreaded applications.

What does "Barebone" mean?

The Shuttle X50 Barebone is targeted at hardware experts seeking to build a complete system according to their individual requirements. The bulk of components is yet built in, just the following hardware is required to be installed by the purchaser in this case:

- One 6.35cm/2.5" Serial ATA hard disk
- One or two DDR2-667/800 SO-DIMM memory modules (200 pins)
- Optional: USB keyboard and USB mouse
- Operating system (Windows XP/Vista/7 or Linux)

All-in-one PC

Your complete PC system with many components already built in comes in just one single device! This includes the webcam, microphone, mainboard, display, touchscreen input interface, Wireless LAN module and speakers. Saves you more space, looks simply stylish, less wiring.

Slim and chic

Designed as space-savers, this 15.6 inch all-in-one desktop PC only measures 3.6cm in depth.

Fanless power supply

External, fanless 65W power supply for whisper quiet operation

Kensington Lock

This is a small, metal-reinforced hole as part of an anti-theft system. (The lock-and-cable apparatus is not included.)

VGA Port

This VGA port can be used to connect a secondary external LCD display or beamer to the PC. It supports the clone mode operation.

Carrying handle

Cleverly, the stand can be pulled up to serve as a handle - easy to move and light to carry with one hand.

VESA mounting

The stand on the rear can easily be removed unveiling four VESA mounting screw holes that can be used for mounting arms and other mounting devices from a variety of manufacturers.

Shuttle X50 Barebone White Overview (Connectors, buttons, etc.)

- 1 Touchscreen LCD display
- 2 Webcam
- 3 Microphone
- 4 Speakers
- 5 LEDs
- 6 VESA mount
- 7 VGA port

- 8 Stand (or handle)
- 9 Kensington lock
- 10 Vent holes
- 11 Power on button
- 12 Stylus pen with holder
- 13 USB connectors (5x)
- 14 LCD buttons

- 15 DC-input for power supply
- 16 Card-reader
- 17 Audio Line-in
- 18 Audio Line-out
- 19 Microphone input
- 20 Gigabit LAN port (RJ45)

Weight	<p>Net weight: 3.6 kg</p>
Warranty	<p>24 months Bring-in Service</p>

Shuttle X50 Barebone Installation Instructions

As a barebone, the device is delivered without memory and hard drive. Please note the following when installing or removing certain components. The device features two SO-DIMM slots for a maximum capacity of 2x 1GB DDR2-667/800 memory and one 2.5 inch drive bay for one S-ATA hard disk.

Please note and proceed as follows:

- a) Only authorized and skilled personnel must intervent
- b) Improper handling might damage the device which is not covered by warranty
- c) To avoid damage of electrical components by electrostatic discharge (ESD), ensure that the static electricity of your body is diverted permanently before you touch electrical components. Use an earthing wrist strap and an anti-static ground mat, if possible.

(0) Put the device on a soft cloth with the display facing downwards or use the white pouch the device was delivered in.

(1) Disconnect the device from the mains and put it on a soft base with the display facing downward and fold the stand vertically upward. Next, carefully remove the cap with the Shuttle logo that is clicked into place by six hooks. Carefully press the side of the cap with your fingertips to loosen it. Otherwise the cap can be loosened using a plastic card.

(2) Loosen the four cross-head screws (or Phillips screws) to remove the stand

(3) Remove the four cross-head screws that fix the case cover.

(4) The case cover is clicked into place by several hooks. At the bottom of the case is a notch that can be used to lever the case cover out of place by carefully using a screwdriver or plastic card. Be sure to apply only little force in order not to break the hooks.

(5) As the next step, remove the large electromagnetic shielding (EMI cover). This metal sheet is fixed by three cross-head screws.

(6) Another shielding is fixed by four screws. Only remove this part to install or exchange memory modules. To remove such memory modules, carefully bend back the cramps on both sides of the module. Please see the notch when installing the module to make sure it faces in the right direction.

(7) Loosen the four screws of the drive cage.

In case of a hard disk fan is included:

(A) Remove the screws including the affixed fan (B) with its small board (C) while leaving the cables connected.

(8) Please insert a 2.5 inch S-ATA hard disk with the connectors facing towards the metal sheet into the drive cage. Please then fix the hard disk with four screws and carefully push it in afterwards to connect it.

In case of a hard disk fan is included:

(9) Remove the protective foil on the adhesive tape that is attached to the fan. Then fix the drive cage with the fan and board with four screws.

(10) Please re-mount the two electromagnetic shieldings, the case cover and the stand vice versa. Finally, click the cap with the Shuttle logo back into place and cover the four screw holes with the self-adhesive rubber coverings included in the delivery scope.

Overview of parts:

- (A) X50-chassis
- (B) case cover
- (C) stand
- (D) cap with Shuttle logo
- (E) large shielding
- (F) little shielding
- (G) drive cage
- (H) hard disk
- (I) memory modules
- (J) cooling fan (optional)
- (K) small board (optional)

The screws removed:

- (1) hard disk x4
- (2) drive cage x4
- (3) little shielding x4
- (4) large shielding x3
- (5) stand x4
- (6) rubber coverings x4
- (7) case cover x4
